Fact Sheet

Avigilon AI Appliance 2X

Unlock GenAI assisted and server-side video analytics

Boost site security without costly upgrades by providing advanced analytics on existing cameras with Avigilon's AI Appliance 2X (AIA2X). It connects to any NVR, adds up to 160 cameras and leverages Generative AI for comprehensive situational awareness for security operations.

Server-side analytics

Enable Object Detection, Appearance Search, Facial Recognition and Occupancy Counting on existing non-analytic cameras.
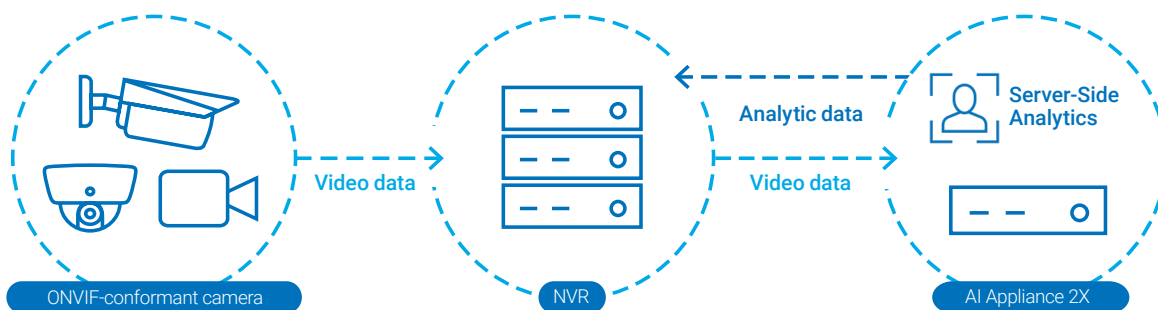

Turnkey deployment

A managed solution purpose-built for security and IT teams with easy setup and remote firmware updates for secure operation.

Generative AI-ready[1]

Create custom alerts using natural language prompts to configure multiple cameras at a time.

ONVIF-conformant camera → Video data → NVR → Video data → AI Appliance 2X (Server-Side Analytics) → Analytic data → NVR
