

# Tedee PRO

Experience best-in-class smart lock technology with Tedee PRO for keyless door access. Unlock your door using your smartphone, smartwatch, or PIN – offering enhanced security and convenience. With Tedee PRO, discover true peace of mind.

Enter your home with pleasure – and without keys. Relish in the luxury of high-quality materials and an award-winning design. Enjoy the superior experience with the sleekest, quietest, and most unique smart lock on the market.

Streamline your daily routine with smooth departures and warm welcomes. The Tedee PRO smart lock is a discreet innovation that brings elegance to your living space, enhancing both your home and lifestyle.

- Change your home access experience by unlocking your door with a smartphone.
- Relax, knowing Tedee PRO automatically secures your home when you leave and return.
- Experience hands-free and automatic door unlocking.
- Provide keyless access permissions to family, friends, and service providers.
- Maintain control with three tiers of virtual keys.
- Monitor who enters and leaves using the smart lock's history feature.
- Handle visitors or deliveries remotely with unlocking features (Tedee smart bridge required).

## Features

- Unlocks your door wirelessly via a smartphone or smartwatch.
- Includes automatic locking and unlocking.
- Offers activity logs through the mobile app.
- Share access with guests, giving them a "virtual extra key."
- Detailed settings for shared access, including permanent, temporary, and recurring options.
- Three user levels for different management features: owner, administrator, and guest.
- Long-lasting power with up to 10 months on a single rechargeable accumulator charge.
- Convenient on-the-door charging via magnetic Micro USB adapter.
- State-of-the-art cloud-based cybersecurity, including banking-level technologies.
- iOS integration with Apple Home system.
- Compatibility with over 15 smart home systems, including Google Home, Amazon Alexa, and more (Tedee smart bridge required).
- Crafted from high-quality anodized aluminum.

## Compatible Accessories

- Tedee smart bridge – Enables remote controls, smart integrations, real-time logs, and advanced automation.
- Tedee keypad – Unlocks the door with a PIN, without the need for other devices or apps.

## Installation Method

- Installed inside the property without impacting the exterior appearance.
- Works with dedicated modular cylinders, adapters, or traditional keys.
- Inside manual rotation for control, similar to a thumbturn.

## Requirements for Installation

### Inward-opening door:

- No extra requirements.

### Outward-opening door:

- A minimum 30mm distance is required between the center of the cylinder and the edge of the door frame, measured from the inside with the door closed.

### Door lock:

- Euro-profile door lock compatible for cylinder replacement with dedicated Tedee-compatible European cylinders (sold separately)

or

- Tedee adapter for existing European cylinders (sold separately, requires one key to be cut)

or

- Compatible Tedee adapters for Scandinavian locks or US deadbolts (sold separately).

## Available Colours

**White / silver**

**Black / graphite**

## Box Contents

- Tedee PRO smart lock
- Allen key
- Micro USB cable with magnetic adapter
- Documentation
